

Looking for efficiency and simplicity for your weighing operations and inventory management?

**We have the optimal solution for you.**

**SigmaGrain** is software specifically designed for weighing operations, inventory management and for managing the transit of grains. Thanks to our expertise in database and software design, combined with our knowledge of the domain of weighbridges, we are able to offer a software solution that is simple, efficient and fast, allowing you to increase your business' productivity and profitability.

**SigmaGrain** includes a set of powerful features that simplify your daily operations, such as automatic calculation of humidity, impurities and handling; global, site, silo, or producer/client-based inventory management; calculation of totals at several levels, transfer to the accounting system and other related systems, printing of a variety of lists and reports also viewable on-screen, as well as several other features.

In addition, **SigmaGrain** provides security of access to the information defined by user or group of users, and its context-sensitive help allows you to instantly obtain the answers relating to its use. Easy to learn, it allows any operator to be functional very quickly.

The main window has all the features allowing you to quickly generate tickets and thus minimize trucker waiting time.

All information relating to the transaction is available on the screen. One also finds menus and toolbars allowing for quick access to all of the systems functionalities.

Designed for

## Main Features

- ✓ Multi-site and multi-enterprise system
- ✓ Management of clients, producers, fields, lots, storage sites, silos, crops, transport orders, contracts, client orders and haulers
- ✓ Purchase, sale, storage and service contracts
- ✓ Global or producer/client inventories
- ✓ Storage site and silo-based inventories
- ✓ Calculation of estimated and actual yield per crop, production and field
- ✓ Automatic calculation of humidity, impurity, and handling deductions
- ✓ Automatic calculation of drying costs
- ✓ Entry of grain analysis values (grade, CCFM, protein, vomitoxin, etc) for each transaction
- ✓ Analysis information to enter definable by product
- ✓ Management of additional fees (fixed amount, percentage, per tonne)
- ✓ Public weighing capability
- ✓ Manual entry of transactions allowed
- ✓ Visualization of transactions in progress
- ✓ Totals at all levels
- ✓ Totals in calendar format
- ✓ Visualization of lists and reports on screen
- ✓ Report Builder / SQL Editor
- ✓ Data exportation in different formats (Excel, Word, HTML, XML, PDF)
- ✓ Interface with existing systems
- ✓ Secure access to information
- ✓ Bilingual

## Options

- . Administration module (SigmaAccess)
  - Dashboard and pivot table
- . Unattended weighing terminal
- . Identification by barcode, magnetic cards or RF tags
- . Barrier and/or traffic light control
- . PDF-format weighing tickets
- . Interface with Sage 50, Acomba and Avantage
- . Possibility of custom development

View your operation results very quickly with the calendar that displays your daily, monthly and yearly totals.

Année	Jan.	Feb.	Mar.	Avr.	Mai	Juin	Juillet	Aug.	Sep.	Oct.	Nov.	Déc.
